About The EHE Foundation

As the world's leading patient advocacy and research organization for epithelioid hemangioendothelioma (EHE), The EHE Foundation is dedicated to funding groundbreaking research and fostering collaboration among patients, caregivers, clinicians, researchers, and industry. Everyday, our work brings us closer to our goal of treatment options and eventually, a cure for people living with EHE.

What is EHE?

An ultra-rare vascular sarcoma that has an estimated incidence of less than 1 per million people. EHE tumors are found most commonly in the liver, lungs, and bones but can arise anywhere in the body. Many people experience significant delays in diagnosis, and currently there are no standard or approved treatments specifically for EHE, and no well studied factors to predict how EHE will behave from one person to another. The disease can be indolent with minimal symptoms, or highly aggressive causing significant pain with very poor prognosis.

**EHE is characterized by two gene fusions:
WWTR1-CAMTA1
and YAP1-TFE3.**

2025 EHE Fun Run & Walk

Virtual Fundraising & Awareness Event

About the Event

Our most anticipated awareness and fundraising event of the year, the virtual EHE Fun Run & Walk, brings communities together to support patients, raise awareness about EHE, and generate critical funds for advancing EHE research. Last year, the 8th Annual EHE Fun Run & Walk welcomed more than 1380 participants and nearly \$80,000 toward impactful EHE research.

Participants can join individually or as part of a team, with some teams hosting local, in-person gatherings. There is always a little friendly competition fostering a sense of camaraderie and shared purpose.

Year after year, this vibrant event broadens EHE awareness well beyond patients and their families. Each registration includes a unisex-designed t-shirt featuring sponsor logos on the back, which participants proudly wear long after the event, further extending EHE's visibility to new audiences.

Event promotion and registration take place in February and March, allowing participants to amplify our mission during EHE Awareness Month in April.
